please tidy cables on desks with cable ties	So it is on our counter which has 2 positions (2 pcs) -1 TCR -1 cheque reader and 2 Passbook printers Underneath the counter are 3 of the Brain boxes. Now what is happening is printers drop off or TCR drops off or Cheque reader drops off - Last issue was the Printer on position ending 3s lost access to port and IT tried to rectify but could not help and deemed a cable tidy as they did not know why we have 3 of the brain boxes . Currently the position 3 s printer is printing to 1s position and its own printer is not connected - IT tried all different combinations of Com ports but still did not pick up and current printer left working could be assigned to any com port and still work - hence they called for a complete cable tidy.
