Fix onsite	<p>User says So it is on our counter which has 2 positions ( 2 pcs ) -1 TCR -1 cheque reader and 2 Passbook printers Underneath the counter are 3 of the Brain boxes. Now what is happening is printers drop off or TCR drops off or Cheque reader drops off - Last issue was the Printer on position ending 3s lost access to port and IT tried to rectify but could not help and deemed a cable tidy as they did not know why we have 3 of the brain boxes . Currently the position 3 s printer is printing to 1s position and its own printer is not connected - IT tried all different combinations of Com ports but still did not pick up and current printer left working could be assigned to any com port and still work.</p> <p>Are you able to assist with that? After the cable tidy the problem still persist.</p> <p>PLEASE ATTEND AS A FIX ON SITE AND WORK WITH SANTANDER TO SEE IF ISSUE CAN BE RESOLVED</p>
